

RupeeZ

AI-powered receivables management for D2C brands in India

Seed round pitch deck - September 2026

Founder: Riya Sharma, Pune

FICTIONAL TEST DATA - for Startup Connect AI QA only

The problem

Indian D2C brands wait 45 to 90 days to collect payments from marketplaces and retail partners.

Finance teams reconcile invoices by hand in spreadsheets, and working capital gets stuck.

Our solution

RupeeZ connects to marketplaces, payment gateways and accounting tools, predicts late payers with machine learning, and automates reminders and reconciliation.

Business model

B2B SaaS subscription priced per brand per month.

Sector: Fintech. Stage: Seed.

Traction

500 paying D2C brands on the platform.

Rs 1.2 Cr in invoices processed every month.

Competition

Top competitors: CredFlow, Chargebee, Zoho Invoice.

RupeeZ is built for D2C marketplace receivables, not generic invoicing.

Team

Team size: 3 people.

Riya Sharma - CEO, ex-fintech product lead. Two engineering co-founders.

The ask

Raising Rs 40 lakh (INR 4,000,000) seed round.

Headquarters: Pune, Maharashtra, India.

Use of funds: engineering hires and go-to-market in Pune and Bengaluru.
